:

The philosophy of Place in Pre- Islamic Arabic Poetry Throuh Ruin Introduction

Abstract : This research aims to investigate the philosophy of place in the Pre-Islamic Arabic Poetry through Ruin introduction which attracts great deal of speaking about place. It also aims to identify the Pre-Islamic people's conception of place.

This research was conducted through doing readings in the texts of place and identifying the parts of and topics of place. It was necessary to the Arab man to transfer from one reality to another as he forecasts the future and changes the present accordingly. The research clearly shows agreement between the poet's language and the social changes in the Pre-Islamic society.
